Vox® Core Tower™

Libraries, learning centers and other public spaces aren't static environments; they require technologically advanced, computer-compatible furniture that can be easily reconfigured, added to, and set at just the right height for people – whatever their age and level of mobility. These venues also need to make efficient use of all available floor space, even awkwardly shaped spaces.

In response to the real furniture needs of libraries and other facilities, Nienkämper is proud to introduce Vox® Monogram Tables™ and Vox® Core Towers™. For maximum flexibility, each Vox® Core Tower™ can supply power and data connections to up to five Vox® Monogram Tables™, which can be grouped in a multitude of space-efficient configurations.

Consider the advantages of this unique Vox® solution:

- Ease of configurability wherever compact computer stations or kiosks are required
- Installations can be easily expanded or reconfigured
- No limit to size of installations
- During installation, tables can be set and locked at desired height
- System accommodates a wide range of computer monitors and CPU's
- Simple, accessible, clutter-free wire management
- Top finishes range from laminate with self edging or high-impact plastic edging to veneer work surfaces with solid wood edging
