THE NEXUS OF STYLE AND TECHNOLOGY

Nienkämper tables have the flexibility to meet the demands of today's ever changing technology anywhere in the world. Let us take care of the technology. You focus on the design.

Our technical support team works with you to provide the optimum solutions for your individual business needs. With over 15 years of experience designing, implementing and integrating Information Technology systems world wide.

Vox® T-legs, Nienkämper NOW® Chairs
Design: Mark Muller

The **Cone** Table embodies all the elements of perfect design. Elegant and sculptural. Understated and timeless. It blends effortlessly into any surroundings and is the perfect compliment to any modern or classic interior. Ideal as a small meeting or dining table, the Cone Table is available in a variety of sizes and finishes. The Cone Table can also be specified with optional power and data forums to support technology demands.

Design: Nienkämper

Arabesque - The traditional arabesque style of geometric patterns with new forms and materials to create a contemporary design with an allusion to romanticism. The simple, clean lines of the Arabesque conference tables have an architectural strength and symmetry which highlight the intricate patterns.

Choose glass conference table tops for a unique conference room statement. Leather wrapped or wood veneer tops offer a distinct yet impressive presence.

Design: Mouna and Silvio Russo

From our North American manufacturing facility, our technical support team provides IT design and integration for business and institutions the world-over.

Vox® Taper legs, Nabu™ Chairs
Design: Mark Muller, BangDesign

Metronome™ is a collection of tables built on a structural system that is sculptural, stable and capable of a broad range of application requirements. From small meeting tables and individual desks to large scale boardroom tables, Metronome™ is a systems-driven table collection that easily responds to any working environment.

Design: figforty

The name **Metronome™** comes from the idea of keeping time and keeping pace with what's going on in the working environment; whether training, boardroom, meeting or stand up tables.

Metronome™ includes multiple table options that also integrate flexible power, data and video connectivity. Table tops in wood veneer, laminate, or glass. The table legs are clear anodized aluminum with polished aluminum details at the top and bottom or fully polished aluminum. Innovative elements and materials impart a lighter scale and a clean modern design aesthetic.

The Vox® Duo base provides maximum storage capacity for cabling and is also ideal for concealing core drills or floor-mounted receptacles. A panel inside each base acts as a spool for excess wire. Designed to perform superbly over many years of use, Vox® products will support technology well into the future.
