FINISHES

All standard Nienkämper veneers and laminates.

On select finish types, 6" radius corners are available on rectangular shaped tops.

Where power troughs are located there are a number of finish options available for the inside surfaces of the trough.

BASE FINISHES

Metronome™ Tables are offered in a variety of finish options. Finishes can be matching in color and finish or mixed and matched to create a unique combination finish.

Base shown: illustrates combination finish. Matching finish consists of all components being visually equal.

The model number you select for the table base determines the finish of the base. For example: Model #39440/2 is a 120"x48" rectangular Metronome™ Table with a mirror polish finish. Model #39410/2 is the same shape and size with an anodized finish on portion "B" but with mirror polished finish on portion "A" as shown on above.

A & B in powder coat paint finish, see below options:

Metronome Table bases in red powder coat finish PC-09

For tables with bases in powder coat, list price is the same as anodized bases. To select powder coat finish, please use the model # of anodized bases and add "PC" at the end. For example, 39403PC/2 is a 84"Lx42"Dx29"H Metronome™ Table with no power trough and bases in powder coat finish.

Note: Stretcher rails are always silver anodized finish

VENEERS

All wood surfaces are protected with a durable polyurethane clear laquer with UV inhibitor. This finish is known for its exceptional durability, as well as abrasion, chemical, impact and scratch resistance. Standard sheen level is 45 degrees. Optional 10 and 35 degree sheen levels are available on request at no additional cost.

P-LAM

Wood grain plastic laminate surfaces are available on table tops with Facet and Taper edges.

These tops are manufactured with a solid wood edge that is applied prior to the laminate top surface. This method conceals the thickness of the wood edge, while providing the durability required. Wood edges are selected that most closely resemble both the species and the color of the laminate chosen

Nienkämper has pre-selected a number of standard wood grain plastic laminates that represent a cross section of both color and species. Simply include the order code with the model number to make these selections. Alternatively wood grain plastic laminates selected outside of Nienkämper's standard selection can be made by specifying the manufacturer as well as the description and model number of the laminate at the time of order. Note: for Facet edge tops the laminate must be a post-forming grade.

COLOURED P-LAM

Both Taper and Facet edge profiles are available with a colored laminate top.

Laminate edging on Taper tops. Edging will match the top surface and is applied prior to the surface laminate. By applying the laminate in this way the seam is positioned horizontally, is much less conspicuous as well as more durable.

Wood edging on Facet and Taper Edge tops is applied prior to the laminate. By applying the wood edge in this way the thickness of the wood edge is concealed, while providing the durability required. Wood species and finishes for edging, can be selected from page 4.

For laminates specified outside of Nienkämper's standard selection, specify the manufacturer as well as the description and model number of the laminate selected at time of order. For Facet edge tops, the laminate must be a post forming grade.

Translucent edging on Taper edge tops is applied after the surface laminate. The translucent edge is very durable. Clear translucent edge provides a good match with most white colored laminates, while silver translucent edge provides a metallic look and contrast to colored plastic laminates.
